

Griffin-Hammis Associates, Inc. Educating and Empowering Through Animation

Griffin-Hammis Associates has started creating animated videos, targeted to people with disabilities! This first set of videos is focused on public benefits and how to financially get ahead when working. The following link takes you to an example of these videos (tailored for Minnesota): www.mn.db101.org/video/benefits

We are excited about the possibilities! These videos could be posted on a website for people with disabilities to access, used by professionals in disability services to address myths about benefits and working, or played during a presentation to educate a group about the basics of work incentives! They provide empowering and accurate messages about work and benefits!

The 6-video series includes:

- What is SSI?
- SSI and Work
- SSI and Youth Who Work
- What is SSDI?
- SSDI and Planning for Work
- SSDI Work Incentives

Cost: \$28,500 for the 6-video series tailored to a specific state

We are excited about increasing access to accurate, empowering information for people with disabilities! If you'd like to learn more about having these videos modified for your state, please contact Molly Sullivan at msullivan@griffinhammis.com.
