1. Finalize Your Storyboard:

Complete your storyboard that could be used to create a photo or video “personal portfolio” highlighting your skills and talents. Sketch possible images—and supporting brief and descriptive narrative—for the basis of a planned presentation and discussion regarding one of three possibilities:

- a) A job proposal to a targeted hypothetical (or real) business regarding a narrow/specific set of skills you possess (example: grant writer; carpenter; welder; sous chef, etc.).
- b) A presentation that you would present and discuss during a “reverse job fair” that highlights your diverse set of skills and talents to a variety of potential businesses.
- c) A presentation for a specific business idea, highlighting the product or service you propose to offer, the skills used to offer these products or services, why this business makes sense for you, and why customers should use your business.

Be prepared to share and discuss your completed storyboard.
